AdvaBond® 7200

AdvaBond® 7200 is a waterborne, chlorinated, maleic anhydride modified polyolefin adhesion promoter for low surface energy substrates. It is designed to work on surfaces without any surface treatment such as corona or flame. Ideal additive for single- ply membrane roofing adhesive formulations.

CHARACTERISTICS

- Superior adhesion to TPO, PP/EPDM without pretreatment.
- Excellent additive for lower temperature curing conditions.
- Can be used as a primer or additive.
- Compatible with various waterborne systems.

APPLICATION

If used as a primer:

- Dilute product in water at 1-10% based on actives.
- Make sure surface is free of any contamination (dirt, oil, grease or others)
- Apply dilution via spray, brush or rod ensuring good coverage.
- Apply top coat or adhesive once substrate is dry.

If used as an additive:

- Add product in system at 1-10% based on a weight basis depending on performance and/or cost requirements.
- Make sure AdvaBond® 7200 is compatible in the system.
- Apply adhesive as per required rates and application

PACKAGING

AdvaBond® 7200 is available in 8 oz. samples, drum and tote quantities.
