AdvaPel® 805

AdvaPel® 805 is a cost effective solvent-based, fluorinated polymer that is based on a short chain, C-6 chemistry. Its durable and transparent barrier imparts excellent water and oil repellency on textiles such as apparel, carpeting and automotive fabrics. AdvaPel® 805 also acts as a penetrating sealer for hard surfaces including porous and dense surfaces such as natural stone, tile, concrete, brick and grout.

CHARACTERISTICS

- Cost effective solution for your protective treatments and penetrating sealers
- Excellent oil, water, and stain repellency
- Various surfaces including hard surfaces as well as leathers and textiles
- C-6 chemistry based; Non-PFOA
- Long lasting properties

APPLICATION

AdvaPel® 805 can be used as a diluted solution containing 5-11% as supplied (1-2% active ingredient) for textile and leather treatment or 13.5-27% as supplied (2.5-5% active ingredient) for hard surfaces. AdvaPel® 805 may be applied using a saturated brush, roller, or mop, or low pressure garden-type sprayer and dry minimum 24 hours before testing.

AdvaPel® 805 is soluble in most hydrocarbons (e.g. heptane, white spirits, isoparaffins), esters, ketones, and hydrocarbon/alcohol mixtures. **DO NOT AEROSOLIZE**

See MSDS for product specific information. Mix well before using.

PACKAGING

AdvaPel® 805 is available in 8 oz. samples, and 350 lbs. drums.

TYPICAL PROPERTIES

Appearance:	Clear Liquid
Solid Content:	18.5%
Specific Gravity:	0.824
