

Product Overview

APW-326 is a silicone wax copolymer emulsion for spray polish applications designed to provide a protective coating with durability, slip and gloss on a variety substrates. APW-326 does not require excessive buffing and will not leave swirl marks on the treated surface. The addition of APW-326 to water with a small amount of agitation will produce a stable dilution at the desired concentration.

Physical Properties

APPEARANCE:	Amber Liquid
SOLID CONTENT:	23%
CARRIER SOLVENT:	Water
% VOC:	<2.0
SPECIFIC GRAVITY (@25 C)	1.01
PH:	6.0

Applications

- Surface protection with high gloss, lubricity, scratch, abrasion and water resistance.
- Minimal agitation is required to form a stable emulsion.

Packaging

Available in 8 oz. samples and 441 lb. drums.

Application Methods

FORMULATION & APPLICATION

Component	Concentration (wt %)
APW-326	10% - 12%
Water	90% - 88%

- Add APW-326 to water and mix until uniform.
- Test surface for appearance prior to overall application.
- Surface to be treated should be clean and dry prior to application.
