

#### TECHNICAL DATA SHEET

**APS-215** 

#### **Product Overview**

APS-215 fluid is a reactive silicone oil used as a synthetic base, diluent or additive for silicone elastomers. Due to the highly reactive hydroxyl end groups, APS-215 may be easily cross-linked into linear polymers using suitable catalysts. The incorporation of silicon hydroxyl groups into the formulation greatly increases the crosslinking and reaction rates.

# **Physical Properties**

APPEARANCE: SPECIFIC GRAVITY (@25 C) Clear Fluid

# **Applications**

Plasticizer for silicone rubbers Diluent for silicone sealants and elastomers Additive for silicone elastomers

## **Packaging**

Available in 8 oz. samples and 440 lb. drums.

### **Application Methods**

**STORAGE** 

When stored in a sealed container at temperatures between 5°C and 30°C, APS-215 fluid has a prolonged shelf life
