

# APS-289 Concentrate

## Product Overview

APS-289 Concentrate was designed for use as a premium, VOC compliant color enhancer and sealer for natural stone such as granite, slate, limestone, and travertine. APS-289 Concentrate penetrates and chemically bonds to the stone, highlighting the natural aesthetics while providing stain and soil resistant properties.

## Physical Properties

APPEARANCE:	Clear to Straw Fluid
SPECIFIC GRAVITY(@25C):	0.96
ACTIVE CONTENT:	>98.0%
VOC: (G/L):	<75.0 g/L

## Applications

- Enhances the natural look of natural stone and masonry substrates.
- Provides excellent water and stain repellency to treated surfaces.
- Suitable for interior and exterior use.
- Effective on horizontal and vertical surfaces.

## Packaging

Available in 8 oz samples and 441-lb drums.

## Application Methods

- Add APS-289 Concentrate to solvent and mix until uniform (take precautions for handling flammable material).
- One gallon of formulated APS-289 Concentrate will cover approximately 250 sq. ft. to 400 sq. ft. depending on surface texture and porosity.
- Always test each type of surface for appearance and penetration before overall application.
- Surface to be treated must be clean and dry prior to application.
- Right before application make sure that the temperature of the substrate to be coated is between 50oF – 85oF.
- Do not allow APS-289 Concentrate to pool or puddle. Wipe surface dry within 5 minutes of application to prevent residue buildup.
