

### TECHNICAL DATA SHEET

# AdvaBond® 8232

#### **Product Overview**

AdvaBond® 8232 is a solvent free chlorinated polyolefin adhesion promoter that will impart excellent adhesion to various low surface energy substrates when added to adhesives, sealants and coatings formulations.

# **Physical Properties**

APPEARANCE: Viscous Yellow Liquid

% SOLIDS: >99%

SPECIFIC GRAVITY: 0.99

# **Applications**

- Superior adhesion to low surface energy substrates, especially to PP, TPO or PP/EPDM.
- Solvent-free, 100% active
  - Ideal for high solids adhesives and sealants formulations
- Zero VOC

## **Packaging**

Available in 8 oz. samples sizes and drum quantities.

# **Application Methods**

AdvaBond® 8232 is designed to be used as an additive to high solids adhesives or sealants systems such as silyl modified polymers.

- Add product in the formulation at 1-10% on a weight basis.
- Addition level can range depending on cost and performance requirements.
- Make sure AdvaBond® 8232 is compatible with the rest of the components.
